READ THIS ROADMAP FIRST

PowerComm

Installation Roadmap

1. **Read the Release Notes**

The ***Release Notes*** provide important information applicable to your operating system release version. In addition, we have put recent information in this document not included elsewhere.

2. **Read the Product Installation Chapter**

We recommend you read the ***Product Installation*** chapter in the ***User Manual*** before installing the software.

3. **Install the PowerComm Software**

To install the software, follow the section in the ***Product Installation*** chapter that is applicable to your operating system version.

4. **Configure the PowerComm Software**

Read and follow the ***Initial Configuration*** chapter to set up PowerComm operating parameters for your hardware and software environment.

5. **Getting Started**

Browse the ***About This Manual*** section for an overview of the PowerComm documentation organization. Refer to the ***Using TCL Commands*** chapter to get started using PowerComm.
